About us

What We Do

SELECT ASSETS

We carefully select financial assets and their instruments, which have a high record of performance, and great future prospects. We then offer these assets to investors.

01

TRADE ASSETS

We have a team of seasoned traders and market analysts who handle trades on behalf of our investors. Our traders combine analysis from artificial intelligence with human expertise.

02

MANAGE ASSETS

We manage these trades on behalf of our investors, provide guidance to them on how to reinvest or plan for future financial security, and generally how to achieve their wealth goals.

03

An Investment firm is a business of one or more experts that provides professional investment service

Spectro Global Trade is an investment company with an approach based on the premise that we must invest and drive development so as to produce a lasting, positive effect on the future of our investors, partners, society at large and ourselves. A premise that also benefits our investment success, since it forces us to understand each business even better and thus reduce risks, and thereby develop our ability to act as progressive owners. The company approach is based on extensive experience of how to successfully build strong companies that enjoy long-term positive development.

After gaining experience in Forex and stock market trading for many years, we decided to form an investment firm besides their trading in order to accept investment funds from members and deposit for Cryptocurrency, Forex and stock trading. spectro-globaltrade.com has been legally registered. If you are toying with the idea of entering the world of online Forex trading and cryptocurrency, then you must consider profit sigma as your investing vehicle. We have an excellent track record of building and transforming our investments into national and international industry leaders. Our experienced investment professionals operate from team-based values. We know that the key to building a successful enterprise is a long-term focus on its core strengths. Our approach is to take a proactive role in our portfolio companies and on top of actively participating through the Board of Directors we also have a very hands-on approach to executing on the identified strategy for our companies.

Our approach is shaped by our experience as entrepreneurs. To scale successfully, you need a partner with deep domain expertise, an understanding of local business cultures, with strong local networks and an ability to support new market entry. We build for the long run, and invest significant time in understanding opportunities, challenges and growth potential, including formulating an exit strategy.

We are everything a traditional financial institution is not. We set out to give investors better, simpler and more profitable ways to become financially successful and secure. An elite company created by professional traders with years of experience, hard-working and accurately carrying out objectives. With our experience and safe approach to trading, we can manage more capital and offer our investment platform to the public and at the same time guarantee you our continued credibility and success in the journey. Great efforts have been put in place to provide our clients with a user-friendly interface and an easily understandable profit making investment platform.

We begin by getting a deep understanding of your personal situation, goals and needs. Spectro Global Trade uses this information in our top-down investment process to first determine the mix of Alternative funds, fixed income, cash or other securities that maximizes the likelihood of reaching your financial goals. We believe this decision has the biggest impact on your returns over time. From there, we emphasise parts of the market we believe will perform best, such as different countries and assets market sectors. Finally, we analyze individual stocks and other securities and select those we believe will perform best. We believe this active, flexible approach to portfolio management enables us to capitalize on global investing opportunities and help you achieve your financial goals.

Responsible Investing

We consider environmental, social and governance (ESG) issues throughout the investment decision-making process and life-cycle. We believe that robust and well-implemented ESG policies and practices contribute directly to the long-term success and sustainability of our portfolio companies. Implemented effectively, they help us to protect and enhance reputation and financial performance whilst creating stronger, more valuable companies which can create benefits for all stakeholders: from employees to customers, suppliers to shareholders, and the wider community at large. We review our approach to ESG regularly to ensure that it continues to reflect best practice..

Research driven

In an environment defined by uncertainty, the role that independent, bottom-up research and analysis plays in the investment process becomes ever more critical. Our structure fosters a research environment characterized by focused investment teams and embedded analysts with the ability to take advantage of our global reach. Trading stock options can be complex — even more so than stock trading. When you buy a stock, you just decide how many shares you want, and your broker fills the order at the prevailing market price or a limit price you set. Options trading requires an understanding of advanced strategies, and the process for opening an options trading account includes a few more steps than opening a typical investment account.
